1. This opinion contains indications relating to the following items:

- ☒ Box No. I Basis of the opinion
- ☐ Box No. II Priority
- ☐ Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
- ☐ Box No. IV Lack of unity of invention
- ☒ Box No. V Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
- ☐ Box No. VI Certain documents cited
- ☐ Box No. VII Certain defects in the international application
- ☐ Box No. VIII Certain observations on the international application

2. FURTHER ACTION

If a demand for international preliminary examination is made, this opinion will be considered to be a written opinion of the International Preliminary Examining Authority ("IPEA") except that this does not apply where the applicant chooses an Authority other than this one to be the IPEA and the chosen IPEA has notified the International Bureau under Rule 66.1bis(b) that written opinions of this International Searching Authority will not be so considered.

If this opinion is, as provided above, considered to be a written opinion of the IPEA, the applicant is invited to submit to the IPEA a written reply together, where appropriate, with amendments, before the expiration of 3 months from the date of mailing of Form PCT/ISA/220 or before the expiration of 22 months from the priority date, whichever expires later.

For further options, see Form PCT/ISA/220.

WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY

International application No.

PCT/US05/05882

Box No. I Basis of this opinion

1. With regard to the language, this opinion has been established on the basis of:

☒ the international application in the language in which it was filed

☐ a translation of the international application into _____, which is the language of a translation furnished for the purposes of international search (Rules 12.3(a) and 23.1(b)).

2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:

a. type of material

☐ a sequence listing

☐ table(s) related to the sequence listing

b. format of material

☐ on paper

☐ in electronic form

c. time of filing/furnishing

☐ contained in the international application as filed.

☐ filed together with the international application in electronic form.

☐ furnished subsequently to this Authority for the purposes of search.

3. ☐ In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

4. Additional comments:

WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY

International application No.
PCT/US05/05882

Box No. V Reasoned statement under Rule 43 bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims <u>1</u>	YES
	Claims <u>2-18</u>	NO
Inventive step (IS)	Claims <u>NONE</u>	YES
	Claims <u>1-18</u>	NO
Industrial applicability (IA)	Claims <u>1-18</u>	YES
	Claims <u>NONE</u>	NO

2. Citations and explanations:

Claim 1 lacks novelty under PCT Article 33(2) as being anticipated by Rubin et al. .
Rubin teaches a method of coating fabric with an antimicrobial composition. Example 1 discloses the coating composition comprises an antimicrobial agent, Biocide and water. The reference teaches that any antimicrobial composition could be used in making the coating solution. Example 2 discloses the method of the invention, it discloses that the fabric is completely wet by the liquid coating composition. Thus one of ordinary skill in the art would recognize this as a teaching that the coating was completely immersed in the coating solution. The second step of the method is the fabric is dried in an oven. One of ordinary skill in the art would recognize that the solution can be reused to coat other fabric composites because the reference teaches that the solution is reused to re-coat the fabric between iterative coatings and oven drying. Thus the reference anticipates the instant invention.

Claims 1-18 lack an inventive step under PCT Article 33(3) as being obvious over Rubin. Rubin teaches a method of coating fabric with an antimicrobial composition. Example 1 discloses the coating composition comprises an antimicrobial agent, Biocide and water. The reference teaches that any antimicrobial composition could be used in making the coating solution. Example 2 discloses the method of the invention, it discloses that the fabric is completely wet by the liquid coating composition. Thus one of ordinary skill in the art would recognize this as a teaching that the coating was completely immersed in the coating solution. The second step of the method is the fabric is dried in an oven. One of ordinary skill in the art would recognize that the solution can be reused to coat other fabric composites because the reference teaches that the solution is reused to re-coat the fabric between iterative coatings and oven drying. Thus the reference anticipates the instant invention.

Claims 1-18 meet the criteria set out in PCT Article 33(4), and thus have industrial applicability because the subject matter claimed can be made or used in industry.
